First look: Yacht Street  
For our first real-world application of OpenSteppe, here's a view from Yacht Street, in Seattle. The riverfront area of Yacht Street saw the city's most profound urban renewal in the late 1960s and early 1970s. It was an area of notorious squalor and crime, but the fortunes of the neighborhood have been transformed in the past several years as new

developments and businesses have taken root along this waterfront. We've been interested in seeing the progress in action, and we finally get the opportunity today as we witness the opening of the Three Links Athletic Club. The site was acquired by Larry Klein in 2006 for a discounted price. He gave it a new look, and the opening of the Yacht Street Bridge Transit Center in 2010 brought new life to the area. Klein has long held a passion for historic preservation, and his construction of the Three Links Athletic Club is one of

---

the most important downtown properties that he has acquired in recent years.

Design: Three Links Athletic Club Klein says the project is like his "most successful design to date." He has designed and constructed the club from scratch, which means that the 8,500-square-foot building is brand new.

They've incorporated elements of the surrounding historic cityscape, and their use of natural materials is a great testament to their commitment to sustainability. Three Links is a beacon for
