[...] Having removed the old desktop Google Desktop for Windows, the company has replaced it with Google Currents for Windows, offering a similar service. Read more here. Google Chrome is taking a slight dive in its market share on Windows devices, according to a recent report from comScore. The reason? Competition. What's new on the Windows 8.1 update front The new operating system is coming with a number of improvements that are designed to offer a more fluid user experience. We have a look at the major changes in Windows 8.1 below. It's a good day for gamers. The Windows Store is now offering official support for the Xbox One. This, however, means that you now have the option to download apps and games for your Xbox One without having to go through a third-party. If you're an Xbox One owner, you can now download a number of titles from the Windows Store to your device. The Xbox

One already has a few games on offer, such as Forza Horizon 2, Ryse: Son of Rome and Dead Rising 3. Although they're not specifically designed for the device, they are compatible with it. You can also download Forza Horizon 3, FIFA 14 and Call of Duty: Black Ops 3. A number of other games are also available, including Total War: Rome II, Deus Ex: Human Revolution, Castlevania: Lords of Shadow, and more. If you're running the latest build of Windows 8.1, you may have noticed that your search results are sorted by relevance. The change is a direct result of the Windows 8.1 update, which rolls in the Bing Search API. What are you searching for? Microsoft announced the latest Bing search update on its blog last week. The search engine giant revealed that Bing will now sort search results by how relevant they are to your search. This update will go live to all Windows 8.1 users on the next scheduled update. Bing may use your location to display results. If you're currently searching for something, the company may

If your answer is yes, Facebook Pop-Up Blocker can help you. It will block all pop-up windows on Facebook. What are pop-ups? A popup is a small window that pops up on your computer screen. It's usually used to display another window that you do not want to see. For example, you click on a link from your friend's news feed, and you're taken to another web page. The link causes a popup to appear on your screen. You can view this popup

by clicking a button in the bottom right-hand corner of your browser, or by clicking on a link in an e-mail. If you don't want the popup to appear, you can click anywhere outside the popup window. The popup disappears and you'll no longer be taken to that web page. Facebook Pop-Up Blocker This extension will block all pop-ups on Facebook. You'll also see a message whenever a popup is about to appear. You can click on the message to close it and continue browsing. Steps to install and setup First of all, you'll need to download the extension. When you download it, you can see that it's quite a large file, so you may want to use a web-based download manager like IDM (Internet Download Manager) to download it more quickly. Now that the extension has been downloaded, you'll need to install it. The first time you install it, you

Allows you to easily search the web for recipes of dishes you want to cook. Once you find it, the extension highlights the recipe and shows the preparation steps. I have to agree with the Amazon response that the extension can be useful, but it may also just be an annoyance to you if you only want to read the recipe and not the lists of ingredients or preparation steps. * Upd: Updates added to

the article to reflect Amazon's comment. [Edit: This review has been deleted due to several valid complaints about the review (like the original poster not liking it at all), although I have already read the comment and added a comment to the article] StumbleUpon Search I have to agree with the Amazon response that the extension can be useful, but it may also just be an annoyance to you if you only want to read the recipe and not the lists of ingredients or preparation steps. I have to agree with the Amazon response that the extension can be useful, but it may also just be an annoyance to you if you only want to read the recipe and not the lists of ingredients or preparation steps. Here are the reasons why I think this is useful. 1) It can be nice to find recipes that use ingredients/flavours that you like. 2) It can be nice to find recipes that use ingredients/flavours that you don't like. 3) It can be nice to find recipes that use ingredients/flavours that you're not familiar with. 4) It can be nice to find a recipe that makes use of ingredients/flavours you have in the kitchen already. 1, 2, 3, 4 are all for me, but the other part, the sheer volume of useless garbage on the Internet, is just annoying.
