EBook Builder is a brand new application, which is designed with one goal in mind: to provide users with the tools to create their very own e-books. All the work is done in a two-panel layout, which provides the tools and controls to create a professional and feature-rich e-book in just a few clicks. Users can create a two-column layout, left or right, and choose from over 65 chapter templates that can be modified, such as page backgrounds, chapter colors, and font types and sizes. They can also create individual pages by selecting a font type, font size, page background, and the number of pages on a page. Users can also protect the finished e-book with a password if they choose. With the ability to format pages in different colors, you can make the pages of your e-book match the style of your website or blog as well. You can also make the pages bold, underline, or it can be in all-caps to make the pages stand out in a PDF. Any changes that are made to the original text on the pages will be preserved when the e-book is saved to the end of a new project. The text can be easily copied and pasted into your word processor to make changes. Once the finished e-book is complete, it can be saved as a stand-alone project that can be opened with just a double-click. All of the work can be done in the same program, making it easy to share the document. Do you want to publish your business book online?
