Scriblits is free to use.Musical theatre instruments have been around for almost as long as have the humans. The phrase "musical instruments" covers a wide variety of sound-producing devices, most of which generally follow the design of two-keyed keyboard instruments. The "International Musical Instruments and Amusements Company" (IMIAC) defines musical instruments as: A musical instrument is a device that is designed or used in the production of sound. Musical instruments are designed to give vibratory, aerodynamic, or acoustical effects, and may also be adapted to produce kinetic or light effects, or visual displays or such. Recent scientific research suggests that the origins of music go back many thousands of years, during the Upper Paleolithic period of pre-historic human evolution. In general, a musical instrument is a device used for making musical sounds. This could be a mechanical mechanism, as in a piano, or it could be an electronic device, as in an iPod. The term often is used to refer to any instrument used to produce music in addition to one that is designed for playing chords such as the guitar or piano, as distinguished from percussion instruments, that is, any type of instrument that is not used to play chords. On the other hand, the term "instrument" is often used to refer to the genre of music that is produced by the instrument
