FIFA Ultimate Team features tons of footballers and clubs from past and present, each with their own unique attributes and abilities. Now you can take control of what you build in the game and be the general manager of your very own FUT squad. Featured Games Two brand new modes for FIFA 22 include career and FUT modes. EA Sports has also added new player attributes including movement, work rate and in-game attributes. The FIFA 22 Player Career mode features game-changing new features. • Automatically take over one of 24 clubs as the manager • Choose the one club that suits you best • Design your team's kits, stadium, train and more • Build a successful team in 4-6 years • Create your own personal Footballers The FIFA 22 FUT mode offers players and their Clubs more ownership and control than ever before. With player appearances changing day by day, it can be tough to predict who will play for your team. However, FUT gives players more control over this through different microtransactions and authentic players. Players can decide which players to buy and when to spend, giving them even more control over their own experience and story as a football star. In terms of gameplay, FIFA 22 adds new and refined gameplay innovations to the core game, including high-level, realistic player movement and two new shooting mechanics: Smart Trajectory and Highlight Rebound, giving players a more immersive and authentic football experience. New controls have been added as well, including The Crucial Throw and The Big Pass. The Crucial Throw delivers unpredictable and creative attacking opportunities, like the through ball. The Big Pass allows players to kick the ball in the air with the timing and angle of a true centre forward, like Messi and Ronaldo. Are you ready to take your game to the next level? Get FIFA 22 on 2 November for Xbox One™ and Xbox 360®. Playing alone won't cut it for these Ultimate Teamers. Form your very own squad of the world's best footballers as you fight to take it all, one squad member at a time. Choose from a selection of icons like Neymar or take command of a lesser-known, but equally great, footballing superstar. If you are a FIFA Ultimate Team™ player, the community is also waiting to test your skills. Win weekly and monthly leaderboards across a range of FUT achievements with weekly, monthly and season challenges

What's new in Fifa 22:

- **New Player Movement** - Move with intense tenacity and unpredictable dexterity. Attack with ease to pull off world-class feints and tricks, check diagonals at full speed, or flick passes to teammates at your command. The greater the distance and speed of your run, the greater your acceleration. **New dribbling controls** - Head flicks more naturally slide past players. **Boost sprinting** by pressing the right Analog Stick. Speed up by dragging or gliding your feet along the pitch; slow down by exerting more effort with the left. **New Shoot Range and Sensitivity Controls** - Exert greater control of your shooting by raising or lowering your knee. Spin less on your shots to ensure accuracy. **New ball control** - Kick the football more naturally with new near- and far-post controls. Effortlessly shift the ball with right- and left-sided kicks or use a set-up to send in the centre. **Control skill shots** by propelling off the post and saving for an ambitious finish. **New pass controls** - Use the new near- and far-post controls to create and guide passes, and more intuitive central passing. Select your accuracy with the press-and-hold of the right Analog Stick. **New reception controls** - Dive to keep the ball and kick off/on the ground to evade tackles. Both dribble and pass with balance to equalize when on the ground. **New dribbling controls** - Dodge defenders, avoid tackles, spin and glide dribbles in the air. **New final ball** - Time your jinks to create space and boost a run to the far post. Use positional play-offs to pull off prodigious distance passes. **Ultimate Team** - Introduce your own creation and choose from a variety of kits and training drills. Customise your new player with edited boots and gloves.

This month's update adds functionality to news feeds and introduces the Career post-match player stats screen that lets you check your entire game once you've selected the feature. Pitch preparation has been updated for the standard and international formats, too.
