----- For feedback, please visit my site: www.GravitationGames.com or my Facebook site here: www.facebook.com/GravitationGames Follow me on Twitter: twitter.com/GravitationG It's that time of year once again! Every year people around the globe celebrate the beauty of spring, also called the greening of the Earth. Is it any wonder that so many people from every country around the globe have an affinity for exotic, ocean-themed holidays such as the Easter Bunny, the Chinese New Year Dragon Dance and Saint Patrick's Day? I think not. This season brings to life the beauty and wonder of living on the planet Earth. The plants are blossoming, the birds are nesting, the bees are buzzing and more importantly, our relationships with each other are prospering. All this year long, be sure to delight in the beautiful seasons, share the love and spread happiness to all around you. As the Divine Creator of all that is, I wish you the energy of the Universal Source. May you receive from your sun the energy that is the source of life. May your thoughts, hopes and dreams promote and support happiness, serenity and love in the world. May your happiness empower you to improve the world and share the presence of that happiness in all that you do. P.S. In fact, today it has just occurred to me that I am going to remain in the way of the sun. Find and enjoy the sun. Features Key:

A multiplayer game inspired by 'Moon Doctrine' and 'Superposition'. Explore an inhabited maze fighting off an alien invasion. Encounter multi-coloured asteroids and skillfully dodge their rending impact. Hantai-inspired visuals including motion blur and particle effects. Planetary base building, extensive tracking abilities, jump and sprint - much of the time you'll have to think ahead and control your character to beat the alien hordes.

Deepfield Upscale Version

- **Demo version with more content and gameplay elements ready for download. We will be making the game available for download on Google Play and the Apple Store as soon as we have ironed out the few bugs left in the demo build.**
- **Play the full game on mobile and tablets in HD or fully zoom out to peer over the shoulder of the alien invasion.**

Tools

Paints

- **The landscape is procedurally generated with templates made using nature pigments, 3D objects from here and Deepfield**
- **The art of aliens is created using procedural textures to preserve the organic and geometric nature of Deepfield.**
- **Hot pink was added to the game to save you going cold! :D**

Tech

- **3D model & motion tracking using Kinect v2.**
- **Calibrated using the OpenKinect plugin in GIMP 2.8.10**
- **Lots of particle effects using OpenToonz 2.0.**

Tools

Code - Rosario

- **This is the most fundamentally code-ridden project to date; everything about the game has been rebuilt from scratch to improve**
