ketosis is the "only perfect" metabolic state, and that in some people with Type 2 diabetes, ketosis is the cause of their ultra-fast, low-carb diets. We recently discussed the top ten restaurants to eat at in Chester County. Now, we are pleased to announce 10 of the best restaurants outside of Philadelphia. Sole Grill, located in West Grove, is the region's number one restaurant in 2012 according to the readers of Pennsylvania Life.

Sole Grill has been voted for the past 7 years. Sole Grill is our favorite date night and also has specialty dishes for those who have special dietary requirements. The restaurant offers a wide variety of dining options, including a full bar, seasonal menu, in house chef, and an amazing wine list. In addition to their 10.5 star review, they also received the

coveted top 5 in the 2013 Dining Guide. We are honored that one of our favorite restaurants was voted the best of the best by Pennsylvanians. This restaurant will always have a special place in our hearts. Mamma Maria's International Café, located in West Grove, has been voted number one for the last 7 years. Mamma Maria's has a world of delicious food in a casual atmosphere. Although, this is a strictly take out and delivery restaurant, they make a fantastic burger and are open for breakfast, lunch and dinner.

However, they are closed on Tuesdays. At the touch of a button, you can order their delicious pizza by phone or in their convenient drive through. Their pizza is a must try. You might be surprised to see the number of Italian restaurants in West Chester County. The first restaurant was Eataly Philadelphia but there are numerous great choices. This makes West Chester County a great area to

A.Q: vba macro code to convert a number with comma or dots into an abbreviated number This is a program for a worksheet containing currency values. I want to convert the number with the comma or dots into the abbreviated number in the column "A" of the next row. By example, I want to convert \$1500,60 to \$1,500. The result would be in the column A next to the original value. In the next row the process would be repeated for the column B. A: Assuming all numbers are separated by a comma, you can use Mid for this: Sub NumberToAbbreviate() Dim i As Long, N As Long N = Cells(1, 1).Value 'First number For i = 2 To Cells(Rows.Count, 1).End(xlUp).Row If i
