Slack is a cloud-based team collaboration tool used by millions of people worldwide for email-style messaging, team-based file sharing, real-time updates and channels. The program is extremely popular for its minimalist interface and ease of use. Backupery for Slack is a simple Slack backup solution that can create data backups at regular intervals and will not save your data directly in Slack itself. It allows you to select cloud storage services from Dropbox, Google Drive, OneDrive, and the Backupery Cloud back up service. The utility features a minimalistic interface and a lightweight, unobtrusive application. How to Install and use Backupery for Slack: Visit the link to download the software on Backupery website. To back up your files from Slack, go to "Settings" and then to the "Backup" tab. Click on "Add your server" and enter the URL of the cloud storage service you would like to use. Enter the folder in which you would like to store your data, and the folder path. Click on the "Edit" button to customize the backup parameters. When everything is set, click on "Save" to access the settings and run the back up process. Please note that the cloud storage services are not free, so you'll have to pay at least $5.25 if you are using the original Backupery app. However, the free version does not include background backup, so you will not be able to perform this function. Install "Backupery for Slack" on your computer and launch it. Connect with one of the cloud storage services you would like to use. Click "Add Server". Complete the connection details and click "Save" when finished. Create your first backup. Click on the "Backup" tab and click on the "Backup Now" button. You can manually control the process by clicking on the "Backup settings" button in the upper right corner. Backupery for Slack Features Regular background backups at intervals The user does not need to explicitly save the files or take any action to perform a backup. It is important to note that regular backups will be performed in the background, meaning that the user will not have to worry about them. Lack of any user interface and minimal
